What can we offer you?

Having already advised many start-ups, we understand the risks you have to face. Our experts will guide you through the various issues you might encounter so that you can focus on what really matters: your business growth. Here are a few of the essential services that we will offer you when starting your business:

-  We help you propose a legal “due diligence” report on your company’s situation and commitments. This so-called **Subscription Due Diligence** allows investors to have a complete view of the legal issues related to your start-up.
-  We also provide you with a **Start-up Legal Package** that contains all the basic legal documents to launch a company. See more about these documents on the following page.
-  Our **Investment Agreement** provides the following in a single agreement:
 - the terms and conditions of the private placement
 - the various securities to be issued
 - the payments and loans to be performed
 - investors’ obligations
 - relationships between shareholders
 - the strategy
 - management remuneration and incentives
 - the decision-making process and organisation of management
 - the organisation of the general assembly
 - ways out and exit.
-  The **IP Report** » provides you with an overview of the situation and precautions to be taken regarding any of the essential assets of a start-up: the intellectual property rights.
-  We act as a “**Mediator**” in case of difficulties between shareholders.
