### **CMS Business of the Year Winner announced at the European Business Awards**

The success of companies and people including **Procter & Gamble, Isuzu Truck (UK) Limited, Intamac Systems Ltd, Econcern, Petrotechnics Limited** and **Steve Leach (Group CEO, Bigmouthmedia)** was marked before an audience of European business leaders, politicians and press at the annual gathering to celebrate **Europe's top businesses and business people.**

**The European Business Awards** recognise and reward excellence, innovation and success. Uniquely open to organisations of all sizes and from any industry sector – public or private, the programme allows the best of European businesses to showcase their achievements and benchmark their successes against companies of all types.

**The CMS Business of the Year is Econcern.** This energy company has used innovative funding and business models to come to market quickly with new ideas and technologies which have environmental sustainability and commercial viability at their heart.

**Robert Derry Evans**, executive partner of CMS, and a category judge, says “***Econcern** is just the type of business Europe needs to be creating. It has established itself as a leader in the sustainable energy sector, which is set to grow exponentially, and has innovation coursing throughout the business, from product design through to business models and management. With triple digit growth numbers in a massive global sector that will continue to see exponential growth for the foreseeable future, **Econcern** has the potential to become one of the world's corporate giants in the next decades.*”

This years Business Awards saw entries from 25 of the 27 member states. Entries flooded in from April 2007, and the exhaustive judging process took 453 working days. There are seven award categories, with each category having a number of 'Ruban d'Honneur' recipients. These semi-finalists are then judged again, and one winner declared in each category. Volunteer judges are drawn from business, political and academic circles across Europe, and the lengthy process is known to be daunting for entrants.
