Cyber Security

Course overview

This course aims to raise awareness amongst staff about recognising legal obligations relating to cyber security and personal data breaches and details the common threats that can occur when handling personal data using technology and how these can be mitigated.

Audience

All staff within a business. This is an introductory course so staff with a dedicated privacy function will need additional training.

Learning objectives

— recognise some key cyber threats
— recognise legal obligations in the event of cyber attacks and personal data breaches
— learn about appropriate security measures that may help to limit cyber threats
— understand breach reporting requirements for organisations

Features:

— content provided by experienced CMS lawyers
— customisable content to suit your organisation
— interactive exercises and examples
— fully mobile responsive
— end of course knowledge check
— can be made available in multiple languages if required

Duration: 20 minutes

Language: English

Publish formats:
— LMS: SCORM 1.2 / 2004 / AICC
— Web / HTML
— PDF (for offline)
