# The power of video in microlearning

## Microlearning

Our microlearning approaches include high-quality explainer videos, motion graphics, and animations designed to simplify complex topics, play through realistic scenarios, or provide a quick refresher.

Microlearning is typically 3–8 minutes long, with a strong emphasis on brevity and a single, focused learning objective—making it ideal for just-in-time learning.

Wrapped within a fully mobile-responsive player, accessible anytime, anywhere, and on any device, this approach can form an intrinsic part of any blended learning solution.

## Video-based learning

Video-based learning services deliver engaging, professionally produced content designed to support deeper understanding and retention. Bite-sized videos are especially powerful – they grab learners' attention, help retain information, and turn knowledge into action. Whether it's presenter-led training, scenario-based walkthroughs, or interviews with subject matter experts, each video is crafted to bring learning to life.
