

Some highlights of our experience

Kymab	Silence Therapeutics	Eli Lilly
Advising on global patent strategy as well as patent drafting and patent prosecution in the field of transgenic mice and the recombinant antibodies they produce. Representation in multi-party, complex proceedings at the European Patent Office at opposition and appeal level, including proceedings with parallel litigation.	Patent prosecution, opposition proceedings and strategic advice in relation to short interfering RNA therapeutics. In this matter the CMS patent attorney team worked hand-in-hand with the CMS patent litigation team in obtaining and enforcing patents in a technically complex area of biotechnology.	Representation in European Patent Office opposition and appeal proceedings relevant to monoclonal antibodies and weight loss therapies.
Insmed	Vectura	Progyny
Representing Insmed in the area of inhaled liposomal antibiotic therapies at the European Patent Office – in pre- and in post-grant opposition and appeal proceedings	Advising on patent strategy and SPC strategy in Europe for inhaled medicines and biologics. Representing Vectura in opposition and appeal proceedings, including proceedings with parallel litigation.	Advising Progyny on the protection and enforcement of its IVF technology patents in Europe
US Plant Biotech Company	Global Pharmaceutical Companies	Thought Leadership
Prosecution advice in the changing landscape of plant patentability at the EPO with a commercially successful outcome.	Successfully opposing commercially relevant patents in the biologicals space on behalf of global pharma and biotechnology companies.	Initiated and continue to run the popular SPC blog including organising the SPC blog annual seminar
Start-up Investment Advice	Antibody Patents	
Providing IP advice and support for investors in multiple university spin-out companies.	Significant experience in patenting antibody-related technology at the EPO, including antibodies to new targets, new antibodies to known targets, new antibody formats, ADCs, and antibody preparation, with particular expertise on case law relevant to this field and in post-grant proceedings before the Opposition Divisions and Technical Board of Appeal.
