# Legal precision in privacy, data security and data protection

Expert legal advisers

2020

## Precious resources need meticulous care

The challenges arising from data are countless and inescapable in our maturing technological landscape. To future-proof your organisation, and unlock opportunity from your data, you need alert and experienced lawyers who will deliver practical advice. Our team of experts includes former regulators who have been right at the heart of the development of the legal landscape in this critical area.

### One-stop-shop

Clients turn to CMS to advise on global data privacy, protection and information security projects. Leading multinational companies, many of which hold large amounts of sensitive data and are heavily regulated, instruct us to advise on multi-jurisdictional projects.

### Global AND local

Our teams are flexible in that they handle both large multinational projects but can also deep-dive for niche, country-specific advice. The teams are on the ground in over 40 countries, speak the local language and understand the local laws – but crucially in a global context.

### Pragmatism and business acumen

CMS has a knack for turning legal advice into practical solutions that make sense not just to your legal teams, but to your other employees, such as the HR function, or software engineers.

## Selected experience

---

CMS is highly experienced in delivering data protection and information security projects for large multinationals and growing businesses alike. In addition to our extensive geographical scope and a pragmatic and commercial mindset, CMS is well-placed to turn legal advice into practical solutions for your business.
