

CMS Client Academy

What is the CMS Client Academy?

With the CMS Client Academy, we offer our clients a learning management system for training, promoting awareness and developing the skills of their employees or business partners. Based on the individual information and training needs of the respective target group, the CMS Client Academy offers the possibility of a customised and target group-oriented training programme.

The legal essentials are taught in an interactive and practice-oriented way in order to firmly imprint the knowledge on the training participants' memory.

Learning content and methods

- E-learning courses covering mandatory training, compliance topics and current legal issues
- E-learning courses with a variety of formats and interactive elements
- E-learning courses tailored to individual information and training needs
- Communication and provision of content using modern means

Benefits of our E-learning courses

- Availability at any time
- Flexibility in terms of location
- Specialist expertise and lawyer know-how
- Didactically valuable control questions
- Certificate of participation after successful completion
- SaaS as well as LMS solutions
