

CMS AVV – for the efficient management of your data processing agreements

CMS AVV is a tool that provides end-to-end support for creating and reviewing data processing agreements in one system. The application enables business departments to manage data processing agreements independently, reducing the workload of the legal and data protection departments. In addition, CMS AVV provides an overview of all internal data processing agreement activities, related information and documents and thus supports the establishment of a GDPR-compliant organisation.

Core functions of CMS AVV

Module 1: Pre-assessment

Clarification in just a few steps, of whether a data processing agreement is needed

Module 2: Creation

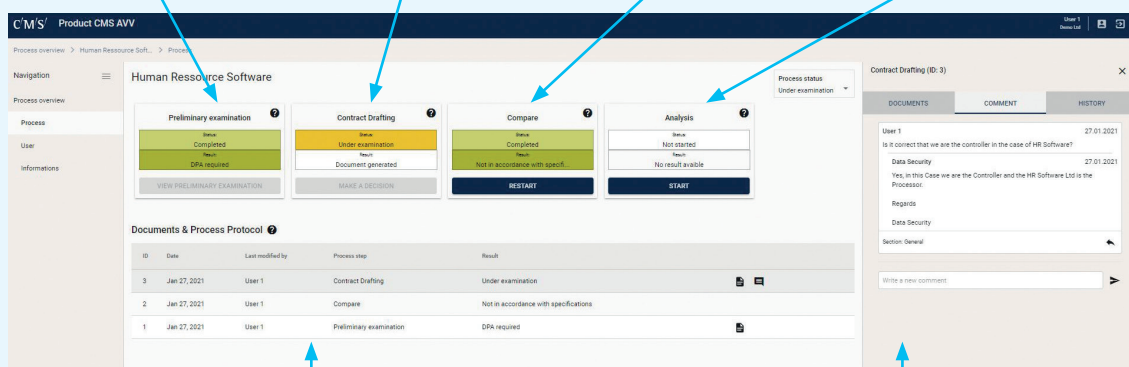

Generation of a data processing agreement with just a few clicks

Module 3: Comparison

Automated comparison of a data processing agreement with standard templates

Module 4: Analysis

AI-based review of third-party contracts against GDPR requirements

The screenshot displays the CMS AVV interface for 'Human Resource Software'. It features a process overview with four stages: Preliminary examination (Completed), Contract Drafting (Under examination), Compare (Completed), and Analysis (Not started). Below this is a 'Documents & Process Protocol' table and a 'Contract Drafting (ID: 3)' detail panel showing a comment history.

ID	Date	Last modified by	Process step	Result
3	Jan 27, 2021	User 1	Contract Drafting	Under examination
2	Jan 27, 2021	User 1	Compare	Not in accordance with specifications
1	Jan 27, 2021	User 1	Preliminary examination	DPK required

All essential stages of the process at a glance

Possibility of internal and external interaction within the system
